

Air Pollution Control Systems
Fabricator/Welder and Maintenance Coordinator

About the Job

Neundorfer specializes in customer-engineered solutions for a niche market. Our manufactured products include models, steel fabrication, and standard mechanical and electrical products. Our roughly 56,000 square foot Willoughby headquarters (two buildings) houses a 40-person staff from a range of disciplines: engineering (mechanical, electrical, chemical, computer), welding and fabrication, product assembly, administration, customer support and project management.

We are seeking a full-time **Fabricator/Welder and Maintenance Coordinator** to fabricate/weld products for our customers, and be responsible for building maintenance and general grounds-keeping. If you are a fabricator/welder and handyman with good communication skills who enjoys applying a range of skills in your work, we would like to hear from you.

Education and Skills

- Welding experience required, certified welder a plus
- Fabrication skills
- Strong organizational and communication skills
- Ability to work effectively with people in a team environment
- General handyman skills
- Grounds-keeping experience a plus

Visit the [Our People](#) page and read the descriptions there to get a better sense of whether you would fit well in our team.

How to Apply

Please send your resume and cover letter to Halle Rose, Vice President, People and Process, haller@neundorfer.com.

About Neundorfer

Neundorfer, Inc. is an innovative, adaptive organization where each of us is personally responsible to customers and each other. We design, troubleshoot and maintain air pollution control equipment and systems for electric utilities and heavy industry customers. We are a forward-looking company with 40 people working at our Willoughby headquarters.

We offer a competitive benefits package including medical, dental, gain share, profit share, and wellness programs.
