Creating the Ideal Model for a Higher-Performing ESP

When a Midwestern cement plant needed to make the most effective use of its outages, Neundorfer developed a plan — and a 1/12th scale model of its ESP — for incremental projects that enabled the plant to realize the greatest performance and reliability gains with a low overall investment.

Service Spotlight

At Neundorfer, we engineer a sophisticated mix of technologies, both proprietary and non-proprietary, that result in cost-effective approaches to reducing waste, increasing efficiency, and improve process effectiveness.

Be Prepared: Stock Up on Spare ESP Parts

Properly functioning parts are essential for a high-performing ESP. Ensure you're covered during your next outage with spare parts from Neundorfer. We offer everything from collecting plates and rigid discharge electrodes to flow modification devices and in-house manufactured components.
